Consent for Children for Physical examination

As part of your child's assessment, your child is required to be examined. This includes an examination of the abdominal region both front and back, also the genital region (penis, scrotum for boys/vulval region for girls) and bottom area. This examination will include visual inspection and touching, but no internal examination of the vagina/rectum.

A parent/carer is requested to remain in the room for all patients under the age of 18 years, although a curtain may be drawn at the patient's request. You may choose to have a chaperone present which can be a family member, friend or one of our staff.

Without consenting to this examination it may not be possible to fully diagnose your child's condition.
